more on request	
Optional accessories	Plako table connector Plako panel Fix or Flex (under-table panel holder)

* For table lengths over 1400 mm, we recommend our traverse set depending on the table top thickness.

PRODUCT FEATURES

OPTIMISED FOR SEMINAR AND CAFETERIA AREAS

The folding table is specifically designed for use in seminar and cafeteria areas.

PARALLEL TABLE LEGS IN FOLDED POSITION

When folded, the table legs align parallel to each other, ensuring they do not overlap. This design eliminates the need for offset mounting of the legs.

SIMPLE ASSEMBLY

The assembly is straightforward and quick, with screws being driven in following a template, making the table ready for use in no time.

INTEGRATED STACKING BUFFER

The integrated stacking buffer ensures handling during storage and facilitates the stacking of tables.

LOW STACKING HEIGHT

The low stacking height makes the frame ideal for smooth storage, especially in areas with limited space.
